INTRODUCTION

The general trend in cryptocurrency and blockchain technology has taken the finance sector by storm. From the era of Central banking, commercial banking and other third-party affiliated financial institutions to the current trend in the centralised finance, the world has and is still undergoing changes that will shape the future in all aspects and not just the financial sector. The application of cryptocurrency even though not limited to the financial sector has seen many tremendous changes in this regard with each hurdle overcome, more milestones are yet to be uncovered so get to the full adoption which is the major goal that would mark defining actualizing its full potential.

The integration of staking, farming, earning and cross-chain swapping in UCF Finance is a sure edge as the current industry problems have been weighed and put into consideration before the development of this project.

We aim to achieve unparalleled results in DeFi staking and Yield Farming without the rug pulling that leads to loss of liquidity as we strive to create a community dedicated to our development and sustainability.

OVERVIEW OF UCF FINANCE

UCF Finance is a blockchain based community of crypto enthusiasts that leverage on the Binance Smart Chain network to deliver its innovative ideas and solutions to the crypto space.

We have adopted BSC for a number of reasons which includes low transaction costs, cross chain swapping, scalability and adaptability.

UCF is a progressive token based on Binance Smart Chain which rewards holders through different means included in its features.

UCF Finance is a DEX, Defi, NFT marketplace, blockchain project developing by the group of enthusiastic people who loves the decentralization! The decisions and actions of UCF are made by its community through voting to assure equity and fairness for all service through UCF! The UCF Finance Network is a community of students, alumni, and professionals who are interested in finance, accounting, and related fields. The network provides an opportunity for members to connect with each other, share knowledge and experiences, and build relationships. The LuArt is a Official UCF NFT collection creator with up to 200,000 NFT UCF team to a vial of LuArt or by minting a UCF services in the public sale in the future. UCF FINANCE team present LuArt “Platinum” “Gold” “m” ... collections hand made with different opportunities use of the service include some privilegie like fee discounts, access prime news, beautiful bounties from UCF etc.

OUR CORE FEATURES

Farming:

Yield farming is a new innovation introduced to increase value for farmers who deposit their tokens into our different liquidity pool and get LP reward for it.

UCF finance farming uses Smart contracts to allocate rewards based on the liquidity provided. Yield farming is one of the core advantages of decentralized Finance (DeFi) where farmers compete for a chance to farm the best token. This method would be used to reward users who believe and trust in our strategy.

Staking:

This involves holding funds in a cryptocurrency wallet to support the security and operations of a blockchain network. UCF finance offers the staking services where users can either keep their tokens in their wallets or in exchanges and earn staking rewards. All users have to do is to hold your UCF in a wallet or an exchange and earn rewards. Our staking mechanism works with a proof - of - stake POS which is cost effective and energy saving compared to mining that implements the proof - of - work (POW). This is a very robust mechanism to facilitate consensus in a decentralized manner

Earning:

UC finance offers many different ways for holders and the community to earn our token. Farming and staking is one of the major ways our investors can earn passive income by raising a hand. Other tokens can be earned just by staking in the liquidity pool meant for each staked pair. UCF can be staked to earn in the UCF/BNB liquidity pool and so on. This gives investors and stakers a variety of pools to stake their tokens in.

The app feature that allows investors earn is known as crypto earn.

Swapping:

UCF Finance will offer a swapping feature which will enable users to exchange UCF to other cryptocurrencies directly.

This Direct swap feature is also controlled by the smart contract. Pancakeswap will be used for easy, efficient and cost effective swapping of UCF into other Bepro tokens and vice versa.

UCF will be an independent but complementary system to the existing Binance Smart Chain network.

Multiple - chain architecture is used, with the idea being that users can scamheisly transfer assets from one blockchain to another. With this interoperability, users are exposed to a vast ecosystem that can cayor to a myriad of use cases.

MARKETING STRATEGY:

Partnership:

UCF Finance will partner with several financial institutions and blockchain companies to help promote its exchange globally.

Airdrop and Bounty Campaigns:

Airdrop and bounty campaigns are some of the best marketing strategies for every crypto project. Free tokens will be given out all through.

Blockchain Events:

As a global real estate platform, UCF Finance will host several blockchain summits in various continents of the world. These events will bring various crypto influencers together and thereby promote our services.

Listing on Exchanges:

UCF Finance will be listed on major top volume exchanges. Our token and exchange will be listed on coinmarketcap, this is to enable our users to check on a regular price on exchanges, trade our tokens and as well know our rank on coinmarketcap.

Word-of-Mouth:

In today's businesses, word of mouth is the most efficient marketing strategy. We will ensure our support offers 24/7 support to our customers and users of our exchange. This is to help us maintain a high level of customer satisfaction. When customers are satisfied they give positive reviews about the project and this sky-rockets the success of the project.

Social Media Marketing:

Social media today is an efficient marketing strategy for every industry. UCF Finance will adopt all social media marketing strategies to market its exchange and services carried out. The platforms that will be used for paid ads include bing, google, Facebook, Instagram, Twitter, LinkedIn e.t.c

Public Relation:

We will ensure effective public relations. PR articles will be released weekly on top cryptocurrency blogs like Cointelegraph, newsbtc, icobench e.t.c this is to help us publicize our project very well and get the public to know more about our unique strategy

ROADMAP

ROADMAP

HOW TO BUY UCF FINANCE ON PANCAKESWAP USING TRUST WALLET.

- Open your Trust Wallet, check your Trust Wallet if the Browser is visible between Wallet and DEX. If not, go to Safari and type `trust://browser_enable` to activate the DApps Browser. Click on Browser.
- Click on Pancakeswap
- Click on Connect (sometimes you are automatically connected, and sometimes you are not).
- Click on the gear and type in 11%.
- At the top, enter the number of BNB you want to convert to UCF.
- Below that field, click on Select a currency, paste `0xd87e6f186418a7e5b5ad84d236fb75738a852ca9`
- Click on Swap.
- You have now successfully bought UCF.

UCF FINANCE NETWORK

The UCF Finance Network is a community of students, alumni, and professionals who are interested in smartcontracts, cryptocurrencies, NFT, finance, accounting, and related fields. The network provides an opportunity for members to connect with each other, share knowledge and experiences, and build relationships.

Benefits of Joining the UCF Finance Network

There are many benefits to joining the UCF Finance Network. Some of these benefits include:

Networking opportunities: Members of the network have the opportunity to connect with other professionals in the finance industry. This can lead to job opportunities, mentorship, and other valuable connections.

Professional development: The network provides opportunities for members to develop their skills and knowledge in finance and related fields. This includes workshops, seminars, and other educational events.

Access to resources: Members of the network have access to a variety of resources, including job listings, industry news, and research reports.

Community involvement: The network encourages members to get involved in the community by volunteering and participating in charitable events.

How to Join the UCF Finance Network

Joining the UCF Finance Network is easy. Membership is open to UCF students, alumni, faculty, and staff, as well as professionals in finance and related fields. To join the network, simply visit the UCF Finance Network website and fill out the membership application. Once your membership is approved, you will receive access to all the benefits of the network.

In summary, the UCF Finance Network is a valuable resource for anyone interested in finance and related fields. By joining the network, members can connect with other professionals, develop their skills and knowledge, and access a variety of resources. If you are interested in joining the UCF Finance Network, visit their website today.

UCF Finance Network

CONCLUSION

The prospects and advancements in the use of cryptocurrency are still in the mid developmental stages and effort from different sectors to help in this development has yielded great results. UCF Finance has come up with its protocol that will keep its investors and ensure that their investments appreciate with the protocol guiding them. The inclusive and mechanism employed with will keep all our communities safe from the adverse effects of rug pull and ensure a happy user base.
